SUPER SMASH BROS.® BRAWL

STRATEGY GUIDE PART 1 BY ANATOLE BROWN

With so many modes and play options, *Super Smash Bros. Brawl* can be a little daunting when you first fire up the game. Where on earth do you start? Whether you're a veteran *Smash* player or a beginner, The Subspace Emissary is really the best starting point. It's a great introduction to all the characters and their unique moves; this is why it's the default selection. The biggest side benefit to playing the Adventure Mode is that you get to unlock all the secret characters in the game in one fell swoop. In this edition of our continuing *Super Smash Bros. Brawl* coverage, we'll show you in detail how to get a 100% completion in The Subspace Emissary.

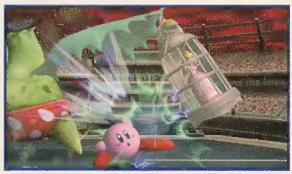
THE SUBSPACE EMISSARY

The difficulty level you choose in Adventure Mode doesn't affect any of the unlocking schemes, so feel free to play at any setting. Just to be clear up front: Contrary to what you may expect, the game will not reward you with anything for getting 100% Clear in The Subspace Emissary—no Trophy, no Sticker, not even a Notice message!* However, a 100% rating will set you up with a nice Vault collection and all the characters in the game.

In order to get 100% clear, you must have a crown symbol over every stage when you complete the game. A green flag indicates that you've finished the stage but did not locate all the special items. In order to achieve a crown rating, you must find every secret location and item on that level, including hidden doors, orange item cubes and bonus items (such as Trophies and CDs). Fortunately, during the course of the game you can return to any stage that you've completed and find any missed items. The game also keeps track of all the secret items you've found so you won't need to find them again. Green item cubes are re-spawned each time you play and do not count toward the Clear tally.

**There is a Notice message for watching all the cutscenes associated with the Adventure mode. This includes the different scenes related to Peach and Zelda, plus other scenes where you choose different sides in one-on-one brawl situations. However, there is no bonus item for this accomplishment.*

MIDAIR STADIUM



Mario and Kirby—It doesn't matter who you choose here; only some of the cutscenes will be slightly different.

Mario, Zelda, Peach and Kirby—After the first match, you will be prompted to line up the order of your team. The Primids and Spaaks can be easily dispensed with simple Smash attacks.

Kirby—Petey Piranha carries two cages: one with Peach and the other with Zelda. Focus on destroying one of the cages (attacking Petey damages both equally, if only slightly). The Princess you choose to save will impact your roster later on.

SKYWORLD

Pit—As you make your way through the clouds, you will come across two green item cubes. Head into the Red door and a cutscene will play, followed by a brawl against Primids. Beat them all to reveal a new path.

Grab the orange item box near the cloud-like Spaak enemies. The Greap can be tough during this first encounter; try to attack its head as much as possible when its blades get stuck in the ground.

Pit and Mario—Watch out for the rotating Glunders and Jyks; they will zap you and raise your damage percentage. The Glunders can be destroyed with Smash attacks, but Jyks can only be removed with explosives, so it's best to jump over them for now.

A hidden red door can be found behind one of the moving podiums. Further on you will fight another brawl session ending with a Roturret. Hop on the launcher and blast off to the last door.

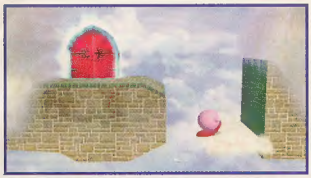
SEA OF CLOUDS

Kirby and Peach or Zelda—Walk to the right for another cutscene. Move to the right again and crush the blocks to keep moving.



Instead of breaking the floating blocks in the next area, use them to jump up to the top and reach the secret red door. As you move downward in the next area, a Beam Sword can be found behind a row of blocks. Enter the red door at the end and keep following the clouds. Just before dropping down, hop over the gray wall (and the pointing arrow) to find a hidden item cube (green) on the other side.

You must destroy the black hole first in order to stop it from spawning more Mites. Use the platforms after the falling boulders to reach the green cube up top on the other side.

THE JUNGLE

Donkey Kong and Diddy Kong—You can throw Koopa shells at enemies, but be careful that they don't hit you. Use the cannon facing downward to crush through the blocks below, revealing an orange cube and a switch. Blast through the line of cannons to the next red door.

Attack the red sliding circles to clear any enemies in your path. A secret item is tucked away behind blocks in the corner just below the patrolling Koopa. Continue up the ladder and break the set of blocks to reveal a secret red door with two cubes inside. Go back out and hit the corkscrew slider to reveal a new platform. Make sure you use the long slider in the next brawl section to help clear the oncoming wave of Goombas and Koopas.

After the next door, you will be placed on a long platform that moves upward. As you fight the waves of Hammer Bros., Goombas and Bullet Bills, be sure to grab the trophy on the platform on the right. Enter the red door above.

As you fall down the crevice, try to stay to the left side (while avoiding the Jyks) so you can land in front of the secret red door. Clear out the Goombas and Giant Goombas at the bottom to reveal the exit door.

THE PLAIN

Mario and Pit—Destroy the very top row of the wall of blocks (off-screen) to reveal a secret item. Also grab the orange cube just above the fire Jyk as you get pushed along by the moving wall.

After you break the blocks to get down to the lower hallway, look for a narrow opening at the top that leads to a secret red door (Pit can fly up there pretty easily). Inside is a healing item and orange item box amongst a pile of blocks. Outside, several brawl sessions will occur on a floating platform before you reach safe ground. Walk to the end for a cutscene and clear the stage.

THE LAKE

Fox and Diddy—Try to stay off the ground as much as possible to avoid Rayquaza's dashing and projectile attacks. If he dives into the ground, stay away from the bulging area or you will be shot out of the arena. Just keep attacking him when he stands off to the side. Sometimes a Super Mushroom will appear, letting you grow to match Rayquaza's size.

Take the orange door to enter a "parallel" world. Break the blocks and proceed through the blue door under the ramp. Now you can collect the item in the orange cube on the other side of the wall at the start of the level.

Down in the caves, the lights will go out and the area will become pitch black. Jump up and attack the ceiling to make the lights come back on. At the top of the ladder, go through the blue door, fight some Towtows, break the blocks on the right and enter the red door.

Enter the orange door, then walk to the right and battle the Goombas to reveal a bomb block. Set it off and re-enter the same door (which is now blue).

THE LAKE CONTINUED Now the same corridor will have an area above where you can jump up and hit the switch. Enter the red door and you will drop down to another orange door.

Enter and defeat the Towtow inside to reveal another door. You will now be on a raft moving downriver. Along the way, you will see another red door. Go inside to fetch two cubes (orange and green) amongst the blocks and sliders. Back on the raft, watch for another orange cube when the Giant Goombas appear.

Purple Bowser is a little slow, but his heavy weight will require you to do considerable damage before you can launch him properly. Keep chipping away at him and Smash him out of the arena.

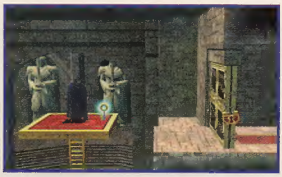
THE RUINED ZOO

Lucas—Keep running away from the statue; don't worry about the enemies too much, as the statue will crush anything in its path. Hit the switches near the gates to open them. The statue will reappear after you cross the water, so don't slow down!

Lucas and Ness—Porky has various attacks, but be extra careful to avoid its spotlight attack when it hovers in the air; this one can dole out some serious damage. Try to jump on top of the cockpit area and attack when it's walking slowly.

Lucas and Pokémon Trainer (Squirtle)—Try to eliminate the Floow enemies as quickly as possible; once they start their multi-attacks, it can be difficult to recover. When they're stunned, you can usually blast them away with another hit. After battling the Pokéball-like Bytans, jump up to the upper level to grab the orange cube. Enter the red door to the next area. After walking over the first structure, find the secret red door just under the ledge on the other side.

THE BATTLEFIELD FORTRESS



Marth—Inside the fortress, climb up the ladder and grab the key to unlock the chained gate to the right. Note that if you get hit while holding the key, the key will return to its original spot. Enter the red door for cubes (orange and green). Continue down the hall to the left and take the lower path. Use a dodge move to get past the fire Jyks and hit the switch on the floor to lower the doors to the green cube. Enter the next red door. Crouch down and hit the switch on the other side of the gate to open it. Hit the next switch on the ground and more enemies will appear. Enter the red door.

Meta Knight and Marth—You will be thrown into a full-on brawl session against waves of enemies. The red dots next to your score indicate the number of enemies left during this lengthy brawl. Back on the battlefield, the screen will start scrolling after you grab the green item box. Keep an eye out for a secret item tucked under a ledge.

A red door can be found at the end of the mine-cart ride. Defeat all the enemies before the next cart to reveal a green item box. Make sure you jump out of the cart at the exclamation point sign or you will fall off the edge. Ride the next set of carts all the way to the next red door.

Ike, Meta Knight and Marth—Clear the enemies and keep going to the right to finish the level. You should have 20% of the map cleared by this point if you've managed to achieve a crown symbol on all the levels so far.

THE FOREST

Link and Yoshi—Jump over the tree stumps and branches and enter the red door by passing through the space in the tree. Inside are two cubes (orange and green). Go to the red door at the end. Avoid riding on the backs of the Trowlons as they will try to lift you up into the air and off the screen.

Destroy the stacks of blocks to find a green cube and an orange cube. The last set of blocks reveals a red door. Hit the switch at the end and platforms leading to a ladder will appear—these are timed, so be quick! Go to the right when you reach the surface and the level will end.

THE RESEARCH FACILITY

Zero Suit Samus—When you arrive at the facility, you'll be on the second floor. Take the elevator up to the third floor for an orange cube. Enter the door on the fourth floor and a cutscene will play.

Zero Suit Samus and Pikachu—This area with the rotating platforms can be considered a central hub that you will be returning to often. Step on the rotating platforms and take the green ladder in the center. A green cube is in the top right corner behind the crates. Drop down and take the green ladder down to the lowest door. In this path, go all the way to the right, grab the key and unlock the chained gate. Go up to the next level and you'll find another key to the right. An orange cube can be found if you keep going right. Use the key to unlock the gate and hit the switch on the left wall. The platform you just activated is actually going to another room, so don't worry about missing the ride. Go back to the rotating platforms area, enter the upper right door and here you'll find where the large platform has moved to.

Ride the platform to the very end and defeat the two Glunders to reveal a switch. Hit it and return to the rotating platforms area. Now enter the third door in the top left corner. The Bytans spawn endlessly here, so don't worry about them too much. Grab the items in the green cube and exit the top door. Keep heading to the right while carefully avoiding the floating mines. Exit the golden door.

At this point, it's a good idea to start visiting the Sticker option in the map sub-menu and boost the stats of your roster; you will be replaying most of the characters from here on out.

THE LAKE SHORE

Link and Yoshi or Mario and Pit—The team you play and who you fight depends on which Princess you saved in the first stage. Link and Yoshi will fight Peach, while Mario and Pit will take on Zelda. After the Princess is defeated (Zelda is a bit tougher than Peach), the two teams will go against each other.

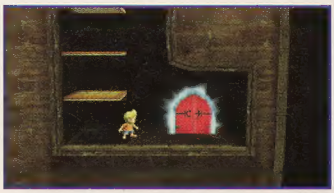
Mario, Link, Yoshi, Kirby and Pit—You can only choose up to four members for your team, so one will be left out. Only one plainly visible green cube is in the first area. After the first red door, the screen will start scrolling across, so don't lag behind. You'll find an orange cube along the way toward the end.

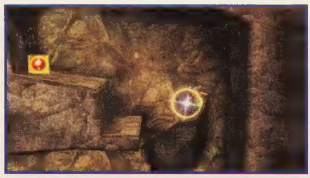
Defeat the Shaydas and drop down to ride the mine cart. As you jump up the platforms toward the top, keep going past the right entrance and jump up to the left corner. Break the stack of blocks to reveal a secret red door containing two cubes (orange and green).

After unlocking the chained gates, defeat the Shaydas and a floating red door will appear. Break the stacks of blocks and fight the next round of opponents. Enter the red door, grab the last two cubes (green and orange), and exit the level.

THE PATH TO THE RUINS

Pokémon Trainer and Lucas—After jumping down the large hill, break the row of blocks to enter the passageway. Take the elevator and defeat the Gamygas. As you move to the right, you will jump over four gaps—jump down into the third gap to find a secret red door. Inside you will find three Trophies/CDs trapped within the wall of blocks (the third one is in the very top row). Just before you exit this area, an orange cube can be found quite easily just under a Jyk.

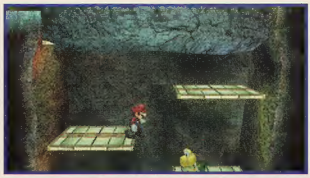




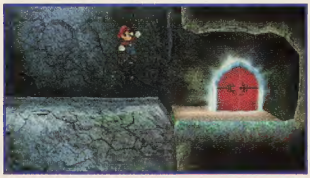
After you pass through the corridor with flaming jets, jump up to the top ledge to find a hidden orange cube. Drop down to the lower level and grab the green cube on the left. As you move to the right, you will confront a series of mini-brawls.

When you battle against Wario, there will be a wall on each side. Try to get him over to one of the walls first, before blasting him into oblivion. Other than that, it should be an easy fight.

THE CAVE



Mario, Link, Yoshi, Kirby and Pit— Again, you can only select four characters here. The beginning is pretty straightforward; just be careful not to get crushed by the giant stone walls as you make your way down to the lower levels. Flicking the analog stick **Down** twice will allow you to fall through platforms quicker.



When you get to the last moving wall, wait until it goes all the way down and you'll find a space above it that you can stand on. This will take you up to the secret door on the right side. You'll have to be extremely quick when retrieving these cubes (orange and green) or you'll get sandwiched. At the bottom of this chasm is another orange cube, but you'll have to be fast to get that one too or you'll get pushed down by the descending wall.

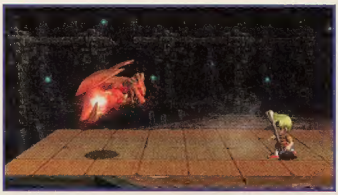
Grab the key, rush past the spiked ceiling and unlock the barrier to the red door. The switch in the next area will temporarily shut down the poisonous gas, but other than that the rest of this level is pretty self-explanatory. A red door can be seen just before you get to the final exit door.

THE RUINS

Lucas and Pokémon Trainer— Ride the mine cart and smash everything in your path. If you miss passing through the closing door, a switch will appear on the left side, so don't worry. A secret Trophy is tucked into one of the obstacles that come down from the ceiling, so keep an eye out for it. At the far end, drop down and hit the farthest switch and quickly enter the red door as you fall.

The next area will scroll across the screen, so don't get left behind. An orange cube can be seen on top of a stack of boxes as you move to the right. The screen will now scroll downward as you descend with the platform. Past the pink spiky crystals is another secret red door with two green cubes.

After the cutscene, the Pokémon Trainer will take control of Ivysaur. You will face a series of mini-brawls before the platform takes you to the other side. Another secret red door can be found by hitting the third switch just under the Roturret. Knock the sleeping Towtow out of the way to reveal the last red door.



There won't be a whole lot of items falling during the Charizard fight, so this is just a straight-up brawl. Charizard will join the Pokémon Trainer once you finish this fight. Use the Down Special move to switch between the three Pokémon.

THE WILDS

Ike, Meta Knight and Marth— A red door can be found just above the exit of the tunnel. Another orange cube is plainly visible sitting amongst the wall of blocks. Keep going and enter the red door. Be careful when descending into the cavern. Watch for falling debris—it indicates that a boulder is about to fall. If you use the cannons to take you to the upper right area, you'll find a secret red door.

Galleom attacks with sheer brute force and has a lot of HP. Use your shield and dodge maneuvers to avoid taking too much damage. Ike's standard attacks are very powerful and can be very useful here.

THE RUINED HALL

Lucas and Pokémon Trainer—Here's another battle against Galleom. Lucas' Down Special attack is insanely powerful, so you shouldn't have too many problems. This short stage will temporarily disappear from the Map upon completion.

THE WILDS (PART 2)

Mario, Link, Yoshi, Kirby and Pit—Use the sliders to defeat enemies quickly. The screen will be scrolling ahead, so don't fall behind. Just after you smash the blocks on the vertical pole, quickly jump down and grab the secret object under the overhang.

At the row of three elevators, get on the last one and jump down the gap after the middle elevator passes to reach the red door below. Inside are two cubes (green and orange). When you reach the surface, an orange cube will be sitting on a lower ledge on the left side. At this point you should be at 40% complete.

THE SWAMP

Fox and Diddy Kong—Instead of hopping past the leaf, let it sink down and you'll be able to spot an opening on a lower level with an orange cube. When the brawl session ends at the end of the path, the screen will start scrolling upward. A red door can be found as you move up the ladders while avoiding the spiky surfaces and Bullet Bills. Inside, use the updraft to get up higher and reach the orange cube.

Falco, Diddy Kong and Fox—There are no platforms or gimmicks in this fight; just keep hammering away at Giant Diddy! You'll need to inflict at least 250% damage before you'll be able to blast him away.

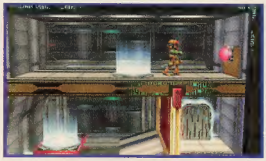
In the next area, an orange cube can be found on a high platform; use the springs to launch yourself upward, then immediately jump and use an Up Special boost. Break the blocks under the spiked barrier to proceed. A secret red door can be found just under the ledge. A green cube and health item are initially available in this room, but if you break the bomb block hidden in the water, a secret object will be revealed. The next area will scroll to the right. The trick to avoiding the thorny spiral plants is to watch the water splashing just before they surface. Falco will be unlocked and join *Brawl* after this level is cleared.

THE RESEARCH FACILITY (PART 2)

Zero Suit Samus and Pikachu—Hit the pink switch and slide down the ladder to find the secret door on the left. The door will be blocked off if the lights go out again, so be quick.

After passing through a short hallway, you will battle two purple Samuses. They're quick, but they don't require a lot of damage to blast them away. Several items fall during this battle, so use them to your advantage.

Pikachu and Samus—Crush the stack of boxes and a secret item will appear on the bottom left. The moving platforms with switches can be a little frustrating, but stopping the first one is usually enough to get by without having to fiddle with the others. In the next area, watch for a stack of blocks with a bomb block on the left as you take the orange platform that moves down; a secret door can be found there.



In the room with the warp platforms, step on the bottom one (move up to warp) and you'll end up in a room with a Roturret. Beat up the enemies and two warp circles will appear. Take the one on the right. In the next room, get up to the next warp circle using the springs. At the next area, use the moving platform to get to the other side. Instead of stepping into the first circle on the square block, step on the farther one and you'll be transported back to the first room, except you'll be in the top area and able to access the switch to open the door. Back in the previous room, step into the warp circle on the square block and you'll drop down to an orange cube. Step into the last circle and you will be able to enter the door.

When you fight Ridley, you'll have to jump and attack, since it rarely touches the ground. When Ridley flies out to the distance and comes charging back, make sure you jump away from the middle part of the platform or you'll get blasted away. Watch for any Bunny Hoods on the ground; you'll be able to jump higher when you put them on. Samus will be unlocked and join *Brawl* after this level is cleared.

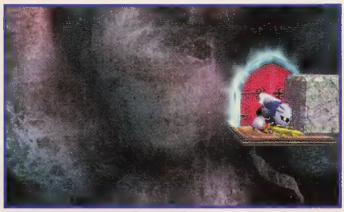
OUTSIDE THE ANCIENT RUINS

Olimar and Captain Falcon—Drop down to the lower level as you cross the bridge to find a hidden red door. If you miss the Trophy that's falling down, you can always re-enter the door and try again. After you climb up to the second level, look for a set of floating blocks that lead to a secret red door above (be careful not to destroy the blocks or you will not be able to get up there).

Diddy Kong, Donkey Kong, Captain Falcon and Olimar—There are 40 enemies altogether in this multi-man brawl. Captain Falcon will join *Brawl* after this level is cleared.

THE GLACIAL PEAK

Meta Knight and Ice Climbers—As soon as you grab the green cube, a spiked wall will start to close in, so dash back to the ladder. The next area features a rising platform—stay toward the middle as much as possible and avoid the jutting spiky walls. A green cube and orange cube can be found as you make your way up the moving ice blocks. Make sure you enter the red door quickly at the top or you will get squished by the spiked ceiling.



When you launch yourself up with the cannon, move to the right and crush the blocks to reveal a secret red door. As you keep moving up the stage, you will pass another red door. Inside this room, use the Metal Boxes to become heavier and sink down into the water to access the ladder on the other side for a green box, random item and orange box.

Lucario vs. Meta Knight—Choose between the two characters and battle. Not a whole lot of items appear here, so you'll need to rely on your basic skills. Lucario will join *Brawl* after this level is cleared.

THE CANYON

Mario, Pit, Link, Yoshi and Kirby—This is a 50 multi-man brawl. The Roturret at the end is really the only significant enemy here. There are no secret items for this stage.

BATTLESHIP HALBERD INTERIOR

Snake, Lucario and Meta Knight—There is a hidden switch on the left wall when you step on the row of falling blocks just near the ladder. A secret door will appear when you hit the switch.

In this area, you'll need to lower the three barriers that block the central ladder. First, take on the enemies in the far upper right and hit the switch on the ceiling. Next, take the ladder at the bottom left, beat up more enemies and hit the switch on the ceiling. Climb up, drop down the gap on the far right, beat up more enemies and hit the ceiling switch.

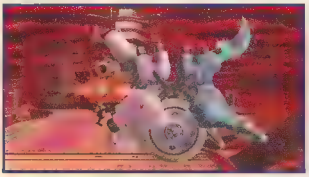
Break the blocks on the upper right ledge and jump up into the corner for a hidden entrance to the secret door. Grab another orange cube just before exiting the door at the bottom of the ladder. Further on, you will reach a door blocked by six blue barriers. You must defeat all six enemies in this area to continue. An orange cube can be found near the Cymul.

This battle between evil Peach and evil Zelda features very few items. Even worse, the two Princesses are also pretty good at picking them up and using them against you. They're pretty light, however, so you can blast them away when they just reach 100%. Snake will join *Brawl* after this level and Gray Fox MGS will be added as an Assist Trophy.

BATTLESHIP HALBERD EXTERIOR

Peach and Sheik—Choose Sheik, since she's better at the platform-jumping ahead (Sheik can transform into Zelda if you do a Down Special). Inside the ship, notice a crack in the ceiling above one of the mines that moves up and down. Hit the mine when it's just under the crack to reveal a hidden orange cube. Outside the ship, jump up to the upper level and grab an orange cube before finishing the level. Depending on whom you rescued during the Petey Piranha battle, either Zelda or Peach will join your team.

BATTLESHIP HALBERD BRIDGE



Lucario, Falco, Fox, Snake, Peach and Sheik—Duon has a lot of HP, but fortunately he's slow and lumbering. There is usually a brief "gearing up" animation just before he launches a particular attack, giving you just enough time to make an evasive maneuver. It's another short level, but when you clear it you will receive Mr. Game & Watch and the Flat Zone 2 stage.

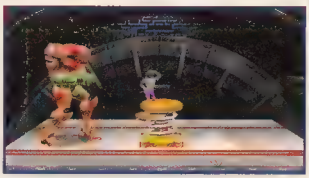
THE SUBSPACE BOMB FACTORY

Samus and Pikachu—On the third level down you'll find a bonus door to the left. It leads to a brief brawl session and two cubes (green and orange). On the next elevator, hit the switch (hidden behind blocks) on the third floor to access another bonus door.

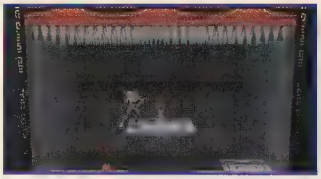
Destroy the dragon head that comes out of the top of the Armank. When the green blob creature (the "driver") becomes exposed, beat him down before the dragon head comes out again. You will get a special item for destroying the Armank.

Another secret door appears on the top floor to the left after you destroy all the R.O.B. Sentries. The orange cube is way up high; you will need to either wall-jump or use a character that has a good triple jump. After this stage, you should have a 60% Clear rating.

THE SUBSPACE BOMB FACTORY (PART 2)

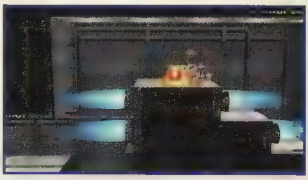


Donkey Kong, Captain Falcon, Olimar and Diddy Kong—The first secret door is on one of the rotating platforms on the second wheel (after the mini-brawl session on the first wheel). It may look like only two green cubes are inside, but if you use the spring at the top, you can collect a hidden orange cube way up high off the screen. Use the Attack button while you're up in the air (off screen) and an item will fall down.



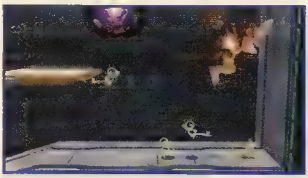
The next area has a door with three lights: blue, red and green. The red switch is directly up above after you crush the barriers overhead. Once you flick the switch, a spiked wall will come down, so make sure you've crushed enough of the barriers to make a smooth descent to the ladder.

The blue switch is to the left when you go down the ladder. Jump up the gap after the blue switch to find a bonus door. The green switch will be to the right, beyond the conveyor belts. Go back up the ladder and all three lights should be lit, allowing you access through the door.

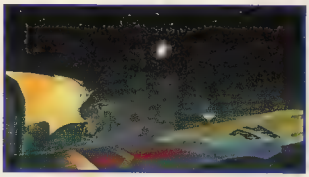


In the next area past the shooting flames, head up the long ladder to the top, hit the switch to the right (to lower the platforms ahead) and break the blocks on the left. Step on the platform, hit the switch on the ceiling to turn off the flames and grab the orange cube on the left. When you reach the top floor, the key to the locked barrier will be inside the last block in the row of blocks to the left.

Captain Falcon, Donkey Kong, Diddy Kong, Pikachu, Olimar, Samus and R.O.B.—This is another 50-man brawl. The final two enemies are Armanks; the best strategy here is to focus on one of them at a time instead of trying to fight them simultaneously.

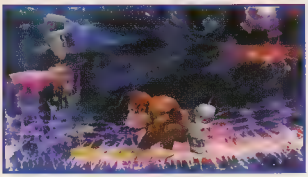


Don't waste too much time with the enemies in this area, since the screen scrolls down pretty quickly. The mines will target and move in on you in the next area if you alert them, so keep your distance. As you move down the zigzag-style path, look out for a Trophy/CD sitting on the ground on the right side—it'll be close to the black hole that spawns Mites.



The Meta Ridley battle has a two-minute time limit, so you'll need to be quick. Sometimes Meta Ridley will pounce on the ship and push it down off-screen; you'll have to be in the air and off the surface at this point or you won't make it. Like the first Ridley battle, keep an eye out for a Bunny Hood. R.O.B. will become unlocked in *Brawl* after this level. The Research Facility/Subspace Bomb Factory area will disappear from the map.

ENTRANCE TO SUBSPACE

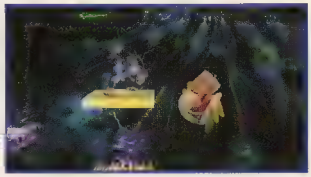


All Characters—This is another great time to go into the Sticker option and upgrade your favorite characters, now that everyone is selectable. Notice the special item sitting next to the raised platform as you move right. This is just a short level where you fight a few mini-bosses like the Greap, Armanks and Big Primids.

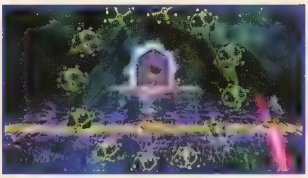
SUBSPACE

(At this point, there is no other selection available on the map.)

Luigi, Ness and King Dedede—Your job now is to re-collect all the Trophies of your comrades. Samus can be found easily just above the first blue door. Enter the next blue door near the arrow (pointing upward). Inside are Pit and Falco along with an orange cube. Just before the next door is Lucas to the right. When you exit the door, immediately go left to grab Ike.



Donkey Kong can be found as you make your way up the yellow platforms. Go to the left, jump on the spring to break the bomb block and enter the floating door. Pick up Pokémon Trainer there. As soon as you break the bomb block, grab Pikachu and dash back to the door before all the blocks disappear.



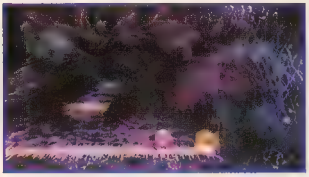
Battle the Mites in the next area, pick up Marth and enter the blue door tucked under the ramp. Use a projectile or electrical attack to destroy the mines and pick up Olimar and Fox. Enter the next blue door on the right.

The key to getting Mr. Game & Watch is to quickly jump up to safe ground as soon as you destroy the bomb block, then simply jump over and pick him up. The screen rotates around clockwise in the next area, so don't get caught behind when picking up Diddy Kong and Captain Falcon. Enter the door on the left side (when the camera moves to that side). Pick up Mario in plain view and exit the level.

You will immediately be thrown into a battle against Bowser as King Dedede (you have no choices here). Bowser will join your team after you defeat him (even though you haven't played him yet). Ness will now join *Brawl*, which also unlocks the Franklin Badge.

SUBSPACE (PART 2)

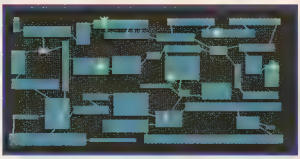
Kirby—Kirby goes solo to find the rest of the trophies. Pick up Peach on the high platform. Use Kirby's Final Cutter move to blow up the mines and grab Zelda.



Below Meta Knight is an orange box (where the Primids gather). In the next area, keep breaking the bomb blocks to go lower; grab Link, Yoshi and Lucario as you move down. After a mini-brawl session, the screen will start scrolling pretty quickly while Spaaks try to distract you. After the second mini-brawl, grab R.O.B. and exit the blue door. Use the slider to access the Ice Climbers. Before getting on the next launching pad, get the orange cube at the foot of the cliff. Use the next slider to get Snake. After fighting the Gamyga and a few Tickens, grab Wario and exit. Ganondorf and Wario will join your team. Co-op Events 9-13 will be unlocked after completing the Subspace stages.

THE GREAT MAZE

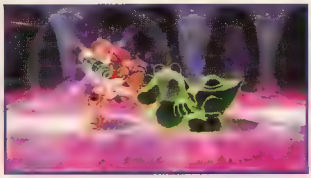
All Characters—The Great Maze may seem confusing at first, but if you pay attention to the map, it's really quite simple (pause the game at any time to view it). The shining beacons on the map indicate save rooms (like the first room). Here you can save the game, replenish all your extra lives, set your damage back to 0% and upgrade your characters with Stickers. The small green dots on the map indicate doors. If you ever get lost, simply find a green dot that isn't connected to another green dot (this means you haven't gone through that door yet).



Go through the first red door and immediately you will relive the boss battle against Petey Piranha. The next red door will take you to Skyworld. Start with the left door and fight Pit. He can put on a pretty good battle, but you only need about 80% damage to blast him away. Jump up the cloud platforms to the orange cube before exiting. Now take the right path in Skyworld to the other red door. Fight the Greap and enter the smoking red door to fight Kirby. Afterward, go up the clouds and you will see an orange box tucked away on a ledge. Enter the red door at the top and fight Link.

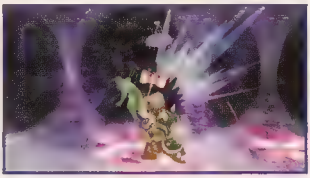
At the Forest-type level, the first orange door will take you into a save room. Go through the yellow door and break the bomb block inside the tree.

If you go back out the door (now blue) you'll be able to grab the orange cube. Keep moving to the right in the "alternate" forest. Skip the first blue door and enter the second one. Break the blocks on the right side and enter the yellow door. Back in the "alternate" world, jump over the spiked floor and break the bomb block before entering the next blue door. Break the bridge-like blocks near the tree trunk and go back to the "alternate" world to pass through the space at the bottom of the tree. Break the bomb block on the other side (so the tree has two spaces) and re-enter the blue door.



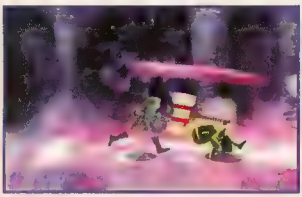
Now enter the red boss door and fight Yoshi. Go through the yellow door again and exit the red door. In the next area, defeat the Gamyga and use the springs to jump up to the green box. Use the slider to gain access to the next orange block and enter another boss door to fight Diddy.

Now you will be in the Fortress-style area. Use the springs to the right of the save room and enter the boss door on the higher platform to fight Duon. You will be thrown onto the Halberd exterior after the fight. Enter the lower door to board the ship.



Take the ladder on the left side and enter the boss door to fight Snake. Next, take the ladder on the right, grab the orange cube and exit the door. Another save room can be found if you go past the elevator. Take the elevator down to the next level and fall down the right side gap to find the key on a ledge. Unlock the barrier, break the bomb block and enter the boss door at the bottom to fight Mr. Game & Watch.

Go back out to the Halberd exterior and continue to the boss door on the right to fight Meta Knight. You will then be warped to a Ruined Zoo-like area. Grab the orange cube after the pool with the tall, spiky stakes.



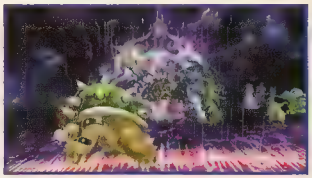
Before entering the red door under the tiled ledge, keep going to the left to the next boss door and fight Ness. Now go back to the door you passed and enter the sewers.

Hit the switch on the left side of the orange door to lower the barrier for the save room. Break the blocks and enter the red door all the way on the left.

Make your way all the way to the left again and enter the boss door to fight Porky.

Next, you will be transported back to the area with the sliders; go through the right door again and return to the "hub" area with five doors. This time, enter the bottom right door to enter the Jungle-themed area.

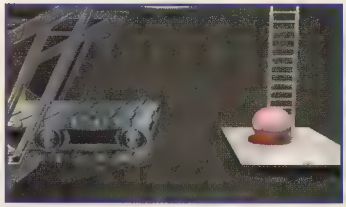
Use caution when descending the ladders so you don't hit the mines. Enter the boss door and fight Captain Falcon. Afterward, you will be transported to a Ruins-themed area. Enter the boss door on the right, fight Olimar and head back to the "hub" area. Take the ladder down on the left side, break the blocks and enter the red door.



Next up is another Jungle area. You'll encounter two boss doors at the end of the path. The top one leads to a battle with Donkey Kong, but you'll end up at a dead end with an elaborate memorial to all the bosses you've beaten in The Great Maze so far. You will need to return here later, obviously.

Go back out, break the blocks and enter the bottom boss door to fight Samus. After the fight, you will be in a Research Facility area. Go all the way to the right, drop down to the lower level and enter the boss door to fight Pikachu. Pick up the key and unlock the barrier to the elevator.

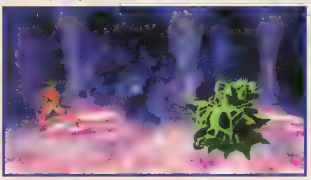
The next area has a boss door that needs to be opened by turning on three switches. The first red switch is just above it. Next, enter the right door to the conveyor belt area. Look for an orange cube all the way to the right.



As you go up, another orange cube will be hidden on a conveyor belt to the left of the ladder. All the way up are the green switch and a boss door that leads to R.O.B. Go back out to the locked door/red switch room and enter the left door. Go to the end, smash the blocks and grab the key and open the barrier. Hit the blue switch and grab a green cube.

Now the main boss door will be unlocked. Inside is a boss battle against Ridley. Fortunately, this fight isn't timed like before. After Ridley, you will be placed in another "hub" area with a save room. Hit the switch on the hovering platform to turn off the poisonous gas and drop down to the door at the bottom.

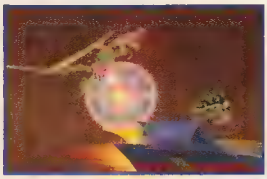
THE GREAT MAZE CONINUED You will end up in the Cave area. If you go up after the door, you can find an orange cube at the top. Go



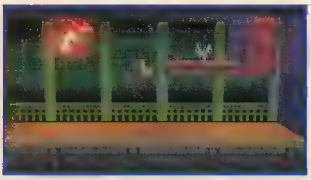
left through the fire and flames and enter the boss door to fight Bowser. When you return, go to the red door at the bottom instead of exiting back from where you came. This leads to a series of mine cart rides—at the end is the boss door for King Dedede. You will then be dropped into the Swamp theme.

Just after the spiked ground and three springs is an orange cube floating high on a platform. Just below is a red boss door that leads to a fight with Falco. After the battle, you will be placed in a bonus room with an orange box—make sure you break the bomb block in the water for an extra secret item. Next, enter the red door that's floating on the platform to the left.

Two arrows will be pointing in either direction. All the way to the right is the boss door for Fox and all the way to the left is a fight against Meta Ridley. You will be back in the "hub" after the Meta Ridley fight. Save and enter the boss door across the poisonous chasm and fight Mario.



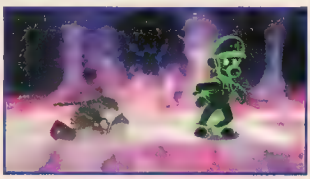
You will now be in the Plains level, which is pretty much a straightforward path all the way to the Galleom battle. You will now be in the next save "hub" area. Take the elevator up to the next floor and enter the red door.



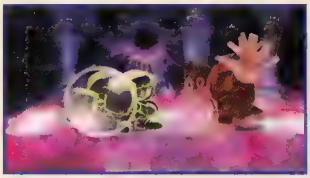
The Ruins area takes you right to a Pokémon Trainer battle with Charizard. Continue through, and just like the regular Ruins level, a secret item will come down from the ceiling near the fire Jyk. The door in the middle of this path merely takes you back to the previous "hub" if you want to save. Keep moving to the right and enter the boss door to fight Zelda.

At the next Plains theme area, fight an Armank and then proceed to battle against Peach. Return to the "hub," take the elevator to the top and climb the ladder on the left. Break the bomb block, enter the door at the top and fight Wario.

At the Ruins area, go right and take the elevator. Keep moving to the right and drop down the third gap to battle Luigi. Go back down the elevator, go left and break the blocks to continue to the next red door.



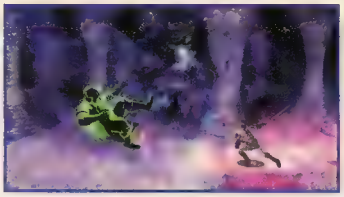
As you go up the see-sawing platforms, look out for an orange cube on the left. Enter the door on the top for Rayquaza. You will now be back at the Stadium, the starting point. Note that the map now marks all the remaining bosses as demon faces.

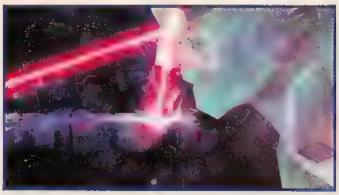


Enter the save room and use the warp pad to the left to return to the previous "hub." Take the elevator to the top and enter the boss door to the right. After fighting Lucas, you will be in the Glacial Peak theme area. Go past the first boss door and go all the way to the top to battle Lucario. You will again find yourself at the starting point Stadium. Use the warp platforms in the Save room and go back to the door you passed earlier in Glacier area to fight the Ice Climbers.

Now you will be in the Battlefield theme stage. A save room can be found as you move to the right. Go to the left after the save door and use the rotating cannon to blast up to the slider mechanism and break the barrier for the next boss door. Inside you will battle Ike. Hit the switch above the save door and enter the door to the right (before the spiked ceiling comes down again). Ignore the key for now and continue up the Fortress to the boss door to fight Marth.

Afterward, use the cannon and launch pad to blast yourself back to the key. Unlock the barrier and fight Ganondorf. Now that all the bosses are defeated, the door to the final boss, Tabuu, will open up.





From here you can choose six characters to take on Tabuu. Attacking Tabuu will require a lot of jumping, since he hardly ever touches the ground. Watch out for his various spearing attacks, including a DK-like ground slap move. Occasionally his face will grow very large and will shoot eyebeams. This is probably the best time to attack, since he cannot warp around and he appears as a big target.

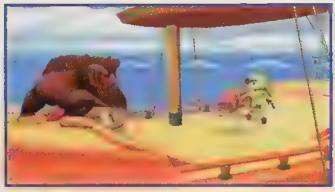
His laser beam attack will shoot across the floor, so stay off the platform during this time. Often after a big attack he will become docile and temporarily vulnerable. When he spreads his wings and shoots out spherical waves, your only chance of survival is doing a dodge roll (Shield + Down and Away), but the timing is very difficult to execute. Another method is to change Pokémon as the Pokémon Trainer during this time, but again this is a tricky maneuver as well. Good thing you have six lives! Keep chipping away at Tabuu and the adventure will be over!

The following items will be unlocked after completing The Subspace Emissary the first time through:

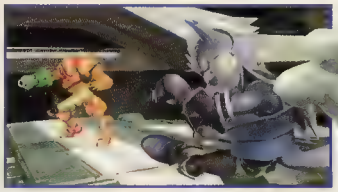
- Sonic joins *Brawl*
- Green Hill Zone stage
- Shadow the Hedgehog added to Assist Trophies
- Ancient Minister Trophy
- Boss Battle CD
- Credits CD
- Boss Battle Song 2 CD
- Step: Subspace CD
- Step: Subspace Ver. 2 CD
- Step: Subspace Ver. 3 CD
- Boss Battles mode appears in Stadium (under Solo)

EXTRA CHARACTERS

If you followed the guide, you should have up to 97% cleared by the time you beat Tabuu. The Forest, The Ruins and The Swamp stages will now appear with flags over them. Revisit these three locations to get Toon Link, Wolf and Jigglypuff; with that, your *Brawl* roster should be complete!



Toon Link—Enter the first red door in The Forest stage and fight Toon Link. He can be pretty feisty and frustrating at first. Notice that you only have one shot at these bonus characters (no extra lives), so if you fail, you'll need to re-enter from the map and try again. The difficulty setting also doesn't matter—he will not be any easier in Easy mode. However, he does not do too well against larger characters like Bowser or Donkey Kong. The Pirate Ship stage will become unlocked after acquiring Toon Link.



Wolf—After the rotating platforms in The Ruins level, you will find three switches down the chasm. Hit the third switch to reveal the door. Go through the flames area and the spiky wall crystals. Skip the bonus door and fall to the bottom door to fight Wolf. He isn't as tough as Toon Link, so this shouldn't be too hard.

Jigglypuff—First, go all the way to the fight against Giant Diddy Kong in The Swamp stage (he'll be a bit stronger than last time). When you get to the water area, instead of jumping into the cannon, swim over to the red door to battle Jigglypuff. He can be pretty hard to blast away because of his recovery ability. Items are your best bet for this fight, so keep an eye out for them.

The following items will be unlocked after acquiring all of the characters in the game:

- Menu 2 CD
- All-Star mode appears in the Solo menu
- All online Friend Icons

Strategy Guide

ARMY OF TWO™

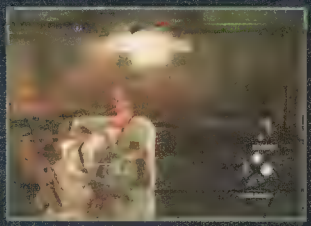
With the war heating up in the Middle East, fictional guns-for-hire company SSC deploys its finest mercenary duo, Tyson Rios and Elliot Salem, into the battle against terrorism. Able to quickly infiltrate heavily guarded compounds and carry out missions that are too risky for government soldiers, Rios and Salem use teamwork, tactics and (most importantly) really large guns to get the job done. This guide will give you the tactical knowledge necessary to see Salem and Rios through to the end of their mission.

BASIC TECHNIQUES

The foundation of *Army of Two* is a reliance on teamwork, and you'll survive longer and be more successful if you take this to heart. Stick with your teammate, cover each other and use your arsenal of teamwork abilities to your best advantage.

Med School for Mercs 101

Salem and Rios are so tough that multiple bullet wounds can't take them out of the fight, at least while the other man is still standing. If you or your buddy drops from excessive lead ventilation, the remaining merc can grab the wounded man by the collar, drag him to safety and administer some quick-and-dirty field repairs to get him back in fighting shape. Of course, if both Salem and Rios get taken out together, there's no coming back. Likewise, if either merc gets taken out and is unreachable by his partner, he'll slowly bleed out until he dies permanently.



The Moving Wall

In many places throughout the game you'll come across riot shields and car doors that can be also used as mobile shields. One merc wields the shield while the other follows and fires from safely behind it. This tactic will give you safe passage through areas with lots of enemies, and can even let you advance on entrenched enemies and wipe them out quickly. And if the gunner isn't dropping bad guys fast enough, the shield-bearer can get in close and bash enemies with it!

The Aggrometer

The concept of aggro is familiar to fans of massively-multiplayer online games (or MMOs). Basically, aggro indicates which player an enemy is focusing his attacks on, essentially leaving any other players in the area alone. In *Army of Two*, one player can draw the attention of any nearby enemies, allowing his partner to sneak around mostly undetected and flank hard to hit armored or entrenched enemy positions. The aggrometer at the top of the screen shows which merc is drawing aggro. Gaining aggro is easy—simply lay down a barrage of gunfire, preferably with a large, loud and obnoxiously pimped-out weapon that your enemies simply cannot ignore.

Using Aggro

Once a teammate has aggro, he'll glow red, while his partner will become transparent, indicating that enemies are ignoring him. Getting your computer-controlled partner to gain aggro is easy—just order him to take over in aggressive stance and he'll fire continuously, letting you sneak around and plug the unaware tangos. Some enemies must be dealt with in this manner, so mastering aggro is essential to conquering the game. Watch for armored enemies as well as enemies manning the shielded turrets throughout the game—they're only vulnerable from the sides and back.

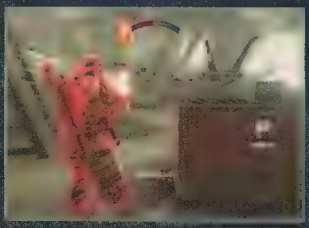
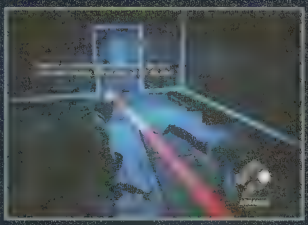
Gearing Up for Aggro/Stealth Tactics

One solid strategy that will serve you well throughout the game is to have one merc outfitted to be the "aggro guy" while the other gears for the sneaky assassin role. For the aggro guy, you'll want a heavy weapon like an assault rifle or light machine gun. Outfit it with an extended ammo clip, front-mounted shield and, of course, the pimped-out option. (Those terrorists can't help but be drawn to that gold-and-platinum-colored monstrosity!) The merc who will be on stealthy cleanup duty should equip a small submachine gun with a silencer. Buy the barrel upgrades for extra stopping power, but forego any options that will draw the attention of enemies.

Overkill

If you can stay in maximum aggro mode for long enough, you'll be able to enter overkill mode. In this mode, the merc with the aggro moves slowly but becomes a walking weapons platform, while the stealth merc gets a speed boost and powered up melee attacks. Enemy movements and attacks are slowed in this mode. Use the short period of time allotted for overkill mode to move forward and sweep aside any enemies foolish enough to be in your path.





The GPS

Your most useful tool is the handy GPS. Activating it will bring up a computerized overlay of your surroundings. The most useful feature is a bright orange trail with moving arrows which shows you where you need to go next. The GPS will also point out important objectives, nearby items (such as riot shields or proximity mines) and useable control panels and doors. If you ever get stuck and can't figure out where to go next, check the GPS and you should find an answer.

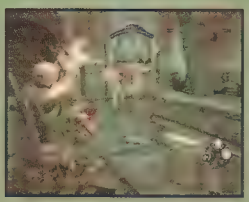
WALKTHROUGH

We'll skip the training mission segment of the first stage, since it's self-explanatory and will get you accustomed to the controls and abilities of your mercenary. Our strategy guide begins when Salem and Rios go boots down in Somalia, immediately following the training segment.

MISSION 1: Somalia

You'll need to use the step climb maneuver for the first time early in this mission. Slowly peek over the edge and take out the guards in the room before climbing all the way up. Always wait a few seconds after clearing rooms in this way to see if any additional enemies will be attracted by the sounds of gunfire, and climb all the way up when the coast is clear.

Rip the car door from the abandoned vehicle and use the shield wall technique to safely advance down the street against heavy resistance.



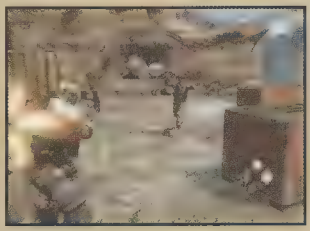
When you reach the courtyard, you'll automatically go into the back-to-back maneuver. While back-to-back, you have infinite ammo, benefit from heightened reflexes (represented by slow-moving enemies) and your shots do extra damage. Clear out the courtyard quickly, then grab cover and fight off the rest of the enemies. Look for the pillar with the chains wrapped around it—use the Action button to pull it down and advance up to the balcony.

Mo Alim will retreat as you advance, sending his bodyguards to defend him. Use cover as you follow him around the corner. Finally, he'll be trapped and have nowhere else to run. He'll take a lot of damage before dropping, but should pose no real threat as long as you're firing from the safety of cover.

Fight to the end of the street and use step jump to reach the balcony and man the twin turrets. Gun down the swarming enemies in the street below. You can use precision aim to zoom in for more accuracy. Hold out until the chopper arrives to finish the mission.

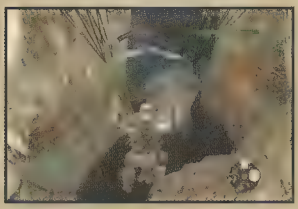
MISSION 2: Afghanistan

You'll parachute into the starting zone for this mission. If you're sniping, start by shooting out the rear rotor blade on the helicopter to stop it from leaving the landing pad, then snipe as many enemies as you can before hitting the ground. If you're manning the parachute, there's not much to do—just come in straight and don't move around too much since it'll affect your teammate's sniping.



You'll immediately form up for some back-to-back gunfighting upon touching down. Watch out for the suicide bombers—they'll rush your position and detonate their explosive vests. Send them on their incendiary way from a good distance to avoid taking a lot of damage.

In the area with the first missile launcher, use the GPS to easily spot the proximity mine attached to a rock near the sandbags. Destroy it from a safe distance. The easiest way to take out the turret gunner guarding the launcher is to have your teammate lay down cover fire from the sandbags while you swing around to the left and flank the gunner. With this accomplished, plant a charge on the missile launcher to destroy it.



The paragliding section of this mission is the trickiest one in the game. If you're steering, you'll need to maneuver around the cliffs and jutting rocks—even brushing against them will cause damage. If you're riding shotgun, stow the sniper rifle and bust out your assault rifle or submachine gun—most of the enemies throughout this section are bunched together and make for easy pickings.

When you enter the enemy bunker, grab some cover as the blast door opens up—enemies will charge your position. Mow them down quickly—a countdown for the second missile launcher will begin. When all of the enemies are killed, run straight across to the launcher while your partner covers you and plant the charge to detonate the missile.

At the top of the stairs just past the missile launcher, use the GPS to locate another proximity mine. Use the standard aggro/flank maneuver to dispatch the armored enemy guarding the doors that lead deeper into the bunker.

You can use the riot shield conveniently located at the bunker entrance to advance on the turret and quickly dispatch the gunner. When you locate Hicks, you can carry him to the elevator, but you'll be limited to your secondary weapon. Teamwork pays off here: Have the unburdened merc lead the way, and carefully follow to keep Hicks—and yourself—out of harm's way.

Al Habiib's chemical weapons bunker is heavily protected. Grab cover and fight your way through his guards and up to the catwalks. After defeating all of the guards, Al Habiib and an armored bodyguard will arrive on the scene. Since the catwalk forms a large square, taking out the bodyguard is easy—have your partner hold aggro while you move around behind him for the killing shot. With his guards eliminated, Al Habiib will run and hide behind cover like the coward that he is. Simply advance and take him out, then enter his storage room and set the last charge to finish off his WMDs for good.

MISSION 3: Iraq

Heavy enemy defenses are backed up by a rooftop turret at the start of this long mission. Have your partner get aggro while you circle around behind the tents on the right to get a flanking shot on the turret.

After locating and rescuing Eisenhower, enemies will storm the rooftop. You'll need to watch the stairs leading up as well as the ladder at the side of the building. Position yourself in the corner of the wall with the ladder on the staircase side and you'll have a good vantage point to cover both areas.

When you reach the bunker rooftop, Alice will inform you of a nearby helicopter that's about to leave with an important target inside. You can use co-op snipe to target and destroy the fuel tank near the chopper; the blast will take out the helicopter and earn some fast cash.

To destroy the bunker, leave your partner in aggressive cover mode to draw enemy fire while you stealthily move up the hill and plant the homing beacon near the side wall of the building.

Ali Youssef has a pair of armored bodyguards; you'll need to use flanking maneuvers to take them out. Fight your way through the gauntlet of enemies between you and Youssef, then flank him quickly, moving from cover to cover to avoid his chain gun fire.

MISSION 4: Aircraft Carrier

You'll paraglide onto the deck of the carrier. If you're sniping, target the enemies with rocket launchers first, then pick off the rest during the descent. When you get close to landing, switch to your primary weapon—you'll be close enough to any remaining enemies to easily spray them with rifle fire.

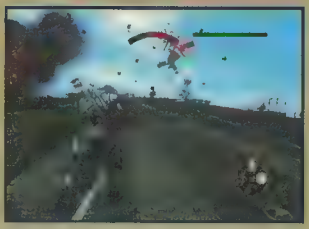
Clear out the enemies on the deck while moving to the target planes and disabling them. More enemies will drop in via helicopter during your advance. Your sniper rifle will serve you well here, letting you pick them off before they can cross the carrier deck and get close enough to be a threat.

When all of the planes are disabled, head all the way back to the rear of the deck (where you landed) and look for the stairs leading down. In the hangar, after clearing out the waves of enemies, use the fighter jet to launch a missile at the locked door, blasting it open. This releases an armored enemy and a few regular soldiers into the room.

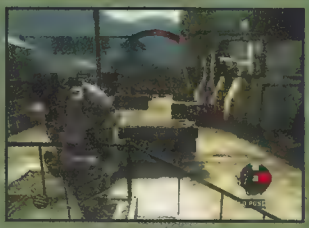
Opening the heavy blast doors leading into the cargo bay reveals an armored enemy wielding a rocket launcher. The easiest way to take him out is to run past him while he's reloading. He'll have to face you or your partner, so whoever has a bead on his unarmored back can quickly dispatch him. After clearing out the cargo bay of enemies, lower the warheads into the hold and then follow the GPS trail to get back to the main deck.

continued

MISSION 4: Aircraft Carrier continued



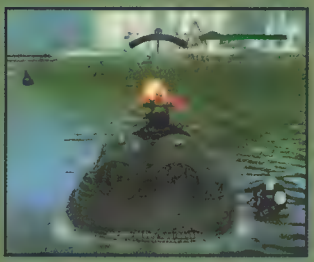
When you get to the deck, everything starts blowing up around you. Run like mad toward the far end, ignoring the enemies along the way (they'll be taken out by flying debris, so they pose little threat to you). Avoid the large crates and head for the lifeboat located at the stern. Once both Rios and Salem are at the boat, the mission will be completed.



When you reach the facility, park the hovercraft and head up the stairs. The first control panel is at the top of the stairs to the left. Use it to open the locked doors. Head back down and bring the hovercraft inside the facility. Take the stairs back up and use the control panel across from the ladder to close the doors and raise the water level. Now fight the opposition to reach the final control panel, which is located at the corner opposite the first one. If you bring a rocket launcher along, you can score some extra cash by destroying the enemy Chinook when it flies in to deposit more troops. Return to the hovercraft and leave the facility behind.

MISSION 5: China

At the top of the path, use co-op snipe and aim for the fuel tank mounted underneath the middle of the bridge. With the bridge destroyed, back track down the path to the waiting hovercraft.



Follow the route along the river, avoiding the floating debris and other obstacles while fighting off the enemy craft and soldiers along the banks. If you're not sure where to go, use the GPS and follow the trail along the water.

You'll face overwhelming odds in the run-down village as multiple Chinook troop carriers flood the area with loads of enemies. Worse, the way forward won't open until you've defeated every last enemy soldier. With the village's multiple levels, balconies and paths, the best strategy is to find a protected corner and make a stand. When all resistance is defeated, you'll be able to leave the area.

Fight through the abandoned buildings to the control panel that opens a door on the top level leading out. Follow the path to the loading area and use the levers to open the doors, then drop down onto the cargo train, your ticket out of the mission area.

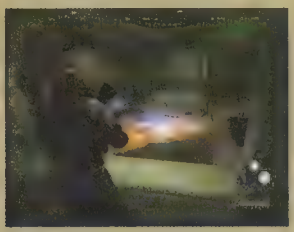
MISSION 6: Miami

The airport terminal is crawling with enemies. Advance slowly and watch all angles—the terrorists will try to flank you, and a lot of the cover in the area will still leave you open on one or more sides. When you reach the far end, take cover in the well of the baggage carousel—enemies will charge your position and you'll need to hold out until the doors to the baggage area open.

MISSION 6: Miami continued

In the baggage area, take cover and fight off the many enemies. Lob grenades into the baggage carrier areas to take out the bad guys hiding there. Head to the second floor and activate the terminal to move the baggage ramp. Follow the GPS trail to locate the door that's blocking the ramp and kick it free. Finally, hop back down to ground level and push the ramp the rest of the way.

Run up the ramp to locate and rescue Alice. Having a high-capacity, high-damage secondary weapon will help now, since you'll have to carry Alice to the extraction point. If the opposition gets too rough, set her down in a safe location and clean up before moving forward again.

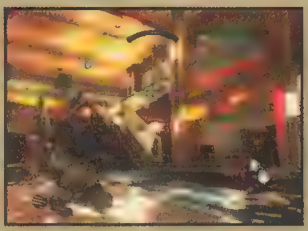


After a short and uneventful hovercraft ride, you'll reach the power station for the monorail. You'll need to use the control panel to shut off the power inside and deactivate the live power line blocking the way, then have your partner stay behind while you cross to the other side. Once you're there, have your partner reactivate the power so you can open the door to the control room and throw the breaker there, restoring the monorail power. Get back to the hovercraft and follow the monorail pillars to the station.

The monorail train will be attacked from all angles by enemies with rocket launchers. Try to snipe them before they can fire. As you pass through the stations, you'll have to fight off numerous enemies. You can use a sniper rifle to pick them off before the train passes close to them, or wait and spray them with machine-gun fire as you roll through.

The lobby of the SSC tower is a hornet's nest of enemy activity. Stick to the walls and use cover. Have one man create aggro and force the enemy to fire on his covered position while the other stealthily moves along the perimeter, wiping out the enemies. When you reach the elevator, you'll discover that it's out of order. Follow the GPS to the control room.

To get the elevator moving again, use the terminal in the control room, then return to the lobby and use the laptop on the security desk at the bottom of the main stairs. This will get the elevator moving, but it will stop on the third floor. Head back upstairs and up onto its roof to ride up to the top level.



On the ground floor of the penthouse suite, watch out for the armored guard with the rocket launcher guarding the stairs leading up to the second level. The best way to eliminate him is to charge him while he's reloading and unload your weapon into his unarmored back. When the dust clears from the ground floor firefight, locate and use all of the server terminals along the walls to upload the data and clear your names before heading upstairs.

You'll find Clyde hiding on the third floor with his trusty sniper rifle, guarded by more armored troopers. After clearing out all of the enemies, get some cover and advance on Clyde, opening fire while he's reloading. As long as you stay behind cover to avoid his powerful rifle shots, taking out Clyde isn't very difficult. With their archenemy defeated, Salem and Rios will have completed their final mission...until the sequel, that is!

Cheat Codes

Enter any of the following codes at the title screen, while the words "Push Run Button" are flashing:

Faster gameplay—Press **Up, Down, Right, Right, 2, 2, 1, −**; you'll see the number "2" appear to confirm the code. (On the Classic Controller, press **Up, Down, Right, Right, A, A, B, SELECT** instead; on the GameCube controller, press **Up, Down, Right, Right, A, A, B, Z.**)

With this code in place, press the Jump button to hover in mid-air; press it again to descend. (On the Classic Controller or GameCube controller, press **B, A, A, B, A, B, B, A** instead, then hold the D-pad in the direction indicated above and press **START**.)

Free Weapon Power-Ups

During the game, you can earn free weapon power-ups by climbing partway up any surface that can be climbed (like a fence or the side of a truck) and pressing the following buttons simultaneously while your character is in his "climbing" pose. *Important note:* This will only work if your Life meter has two red bars of energy—no more, no less. You must jab the buttons at the exact same instant in order to trigger the code.

50 bazooka rounds—Tap **Left + 1 + 2** simultaneously. (On the Classic Controller or GameCube controller, tap **Left + A + B** instead.)
50 shotgun rounds—Tap **Right + 1 + 2** simultaneously. (On the Classic Controller or GameCube controller, tap **Right + A + B** instead.)

Virtual Invincibility

When your Life meter has exactly one red bar of energy, enter a doorway, cave entrance or military truck that leads to a room with enemies, crates and/or hostages. You must then exit that room while you still have exactly one red bar of energy, so don't pick up any muscle emphasis tablets, medicine or food. Once you're back outside, hold **Up** so that your character is pushing up against the doorway, cave entrance or truck that you just came from. (Note: To do this trick with one of the military trucks, you must hold **Up** while pushing against the rear corner of the truck.) While continuing to hold **Up**, quickly tap the **✚** button and the **1** button simultaneously. (On the Classic Controller or GameCube controller, hold **Up** and tap **START + B** instead.) You'll hear a chime and your character will flicker to confirm the code. When your energy runs out, you will now reappear with full energy at the spot where you died instead of going back to restart at the last checkpoint. *Important note:* This trick will only work in certain doorways in each stage, so if you can't activate it, try the next room you can find. It does not seem to work anywhere in Stage 6. Also, the effects of the code will be canceled each time you clear a stage or if you lose a life by falling off the screen. So stay away from the bottom of the screen—if you run out of energy and your "death" animation is triggered while you're near the lowest point of the playfield, your body can still fall all the way off the screen in any part of any stage, even if you're not on a bridge or other precipice.

ANIMAL CROSSING: WILD WORLD

Get a Golden Shovel

Buy a second shovel from Tom Nook and bury one of them in the ground. Remember where you buried it, and dig it up 24 hours later to find a Golden Shovel. The Golden Shovel can be used to plant money trees, although they will not always bear fruit.

Get a Golden Net

Catch all the bugs that appear in the game to get the Golden Net from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that bugs given to you by another player do not count toward getting the Golden Net. The Golden Net is wider than the regular net, making it easier to catch bugs.

Get a Golden Rod

Catch all the fish that appear in the game to get the Golden Rod from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that fish given to you by another player do not count toward getting the Golden Rod. The Golden Rod makes it slightly easier to catch fish.

Get a Golden Can

Once Pelly or Phyllis deems your town perfect, keep it perfect for 16 days. The next time you speak to Pelly or Phyllis, you'll get the Golden Can. Using the Golden Can on withering flowers can turn flowers gold.

Get a Golden Slingshot

Shoot 15 floating presents out of the sky with the Slingshot. The 16th present you see float by will be the Golden Slingshot, so don't miss it! The Golden Slingshot fires three bullets at a time, making it easier to shoot down presents.

Get a Golden Axe

Buy a red turnip from Joan and bury it in the ground. This starts a long trading quest which can get you some rare items, such as Tom Nook's Pic, K.K.'s pic, Pascal's Pic and the Golden Axe. Water the red turnip daily and dig it up later. (For this purpose, you can dig it up after one day if you don't feel like spending the time.) The next time Wendell is in town, give him your red turnip. He'll either give you the country guitar or the turban. If you get the country guitar, give it to K.K. Slider the next Saturday and he'll give you his picture. But if Wendell gives you the turban, give it to Saharah to get either a massage chair or a red vase. Give the red vase to Crazy Redd when he's in town to get the safe, which you should give to Tom Nook in exchange for his picture. If you got the massage chair, give it to Tortimer on your town's next holiday to get a scallop. Give the scallop to Pascal when you next see him to get either the Golden Axe or Pascal's pic. You can start the quest over (by purchasing another red turnip) if you want to keep all of the items mentioned above.

Make sure all of your Sub Tanks are full, then play through Armored Armadillo's stage without taking any damage. This is easier than it sounds if you make good use of the Rolling Shield and Storm Tornado. At the end of the stage, jump off the final mine cart so that you stick to the wall above the boss' door, and climb until you reach Dr. Light's Capsule. The Hadoken will kill any boss in one hit (except the final boss) and can be executed in the same way as in the *Street Fighter* series: Quickly rotate the D-pad or analog stick in a quarter-circle movement from **Down** to Forward, followed immediately (if not simultaneously) by the Attack button.

Easy 1-Ups

By jumping up near the middle of Armored Armadillo's stage, you'll find a special bat hovering just above the screen. Unlike all the other bats in the game, it resembles the bats from *Mega Man 7* and *8*. It drops a 1-Up almost every time you kill it, and re-spawns when you leave the screen. Kill it repeatedly to get up to nine lives at a time.

You can continue to attack the fallen opponent by pressing **Up** + △ + ○. Each time you do this, an item will appear. You can continue obtaining items and points indefinitely. When you're ready to move on to the next opponent, just press the **Eject** button again. You can repeat this process for every single opponent. If you die, the screen will fade to white. It will stay in that state until you press **Eject** again. This trick won't work if you defeat an opponent while "Danger Reach" is in effect.

- If you enter the code when the casting cursor appears on the water, the Fish Mood Lens will no longer appear.
- If you enter the code while your lure is in the water, you'll be able to reel in your line by simply holding the right analog stick in any direction (instead of having to rotate it continuously).
- If you enter the code at the "Home Menu" of any tournament, that tournament will be more difficult to win because your opponents' average total weight and fish count will be higher.

HEADHUNTER

Star Dispenser

In the LEILA office is a dispenser marked with a star; inside are all the weapons in the game, plus unlimited ammo for each one. You can't access it during your first time through the game. However, after you finish the game and the credits roll, a prompt will appear asking you to save your game; doing so will create a new save file called "Headhunter V2." Loading this file will put you back at the start of the game, but the difficulty will be increased. The star dispenser will be unlocked when you play Headhunter V2, provided you have satisfied certain conditions:

- At the same time or before you earn your AAA License, beat Hank's record times in all 16 VR missions.
- During the same game that you accomplished the first condition, complete the game once.

Once you leave the LEILA office after obtaining your AAA License, you'll never be able to go back to it again. If you haven't obtained the record for all the VR missions by that time, you won't get access to the star dispenser after completing the game. Note: Completing VR missions by selecting "LEILA" at the main menu does not count; all of the records must be obtained from the VR simulator from within the LEILA office

GBA-GC Connectivity Unlockables

When you link up to the GameCube version of *Lord of the Rings: The Return of the King*, you automatically unlock Sam as well as Ancient Artifacts. Sam can only be used in multiplayer or on the bonus maps.

Increase Damage Stat

First use a character that can equip a two-handed sword or a shield (Aragorn, Eowyn or Gimli). Go to the equipment menu and keep alternating between equipping the two-handed sword and equipping the shield. If you look at your status menu, you'll see that the damage rating for the sword keeps going up. However, when you leave an area, the stats will go back to normal.

Item Duplication Trick

This trick works if you are in a level that has a Ranger Hollow plus a Forge or a Shrine. Make sure the item that you want to duplicate is in your inventory. Save your game into all the open save slots, then quit and reload each of the extra game saves. In each of these extra game saves, toss the item you want to duplicate into the Ranger Hollow. Finally, reload your main game save. The item should appear in the Ranger Hollow three times and also still be in your inventory.

LUNAR LEGEND

Duplicate Items

Equip an item, then unequip it and save the game. Reload the game and you'll have the item equipped with a duplicate in your inventory.

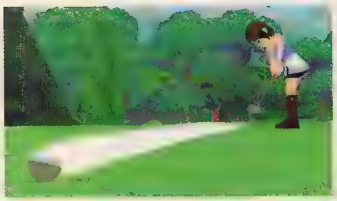
The Incredible Hulk

Publisher: Sega
In Stores: June

If you're a Spider-Man fan, you probably know that gamers suffered through years of mediocre Spidey video games before Neversoft's *Spider-Man* PlayStation game showed everybody how the character should be done. Game designers had a similar epiphany in 2005 when Sierra/Radical Entertainment's *The Incredible Hulk: Ultimate Destruction* set the gold standard for games featuring Marvel Comics jade giant. Sega has acquired the rights to release a new game based on this summer's new *Incredible Hulk* feature film, and along with developer Edge of Reality has wisely decided not to stray too far from the proven *Ultimate Destruction* template. Massive, free-roaming levels with destructible environments? Check. Crazy, giant bosses straight out of the comics? Check. A special meter for building up super moves and ability upgrades? Check. You can even smash up vehicles and use them as makeshift boxing gloves, which was one of *Ultimate Destruction*'s coolest features. The new game's storyline follows the film, but also adds subplots and bonus missions based on the character's comic book history. Among the Hulk's enemies are the Abomination (who also appears in the movie) and the Bi-Beast, a two-faced android who was introduced in the comics during the controversial Betty Ross/Harpy story arc of the early 1970s. And when we say "two-faced," we don't mean that the Bi-Beast is hypocritical or deceitful—he's literally got two faces, one just above the other.

We Love Golf!

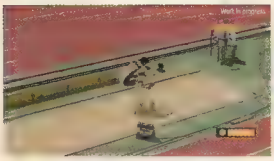
Publisher: Capcom
In Stores: July

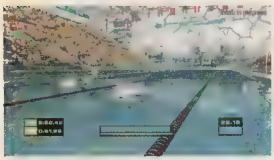


Move over, *Wii Sports*—*We Love Golf!* is a full-featured golf experience for the Wii from Camelot, the maker of *Hot Shots Golf* and the *Mario Golf* series. Wind conditions, club selection and analyzing the course are all factors in your success on the green. You can golf as your Mii and unlock new characters, or you can select from a series of unlockable costumes that make your golfer look like familiar Capcom characters, including *Resident Evil*'s Jill Valentine, *Street Fighter*'s Ken Masters, *Darkstalkers*' Morrigan or even Apollo Justice, ace attorney. Tournament play, mini-games, character matches and more are supported for up to four players, with two-player "Friend" and "World Play" modes available online.

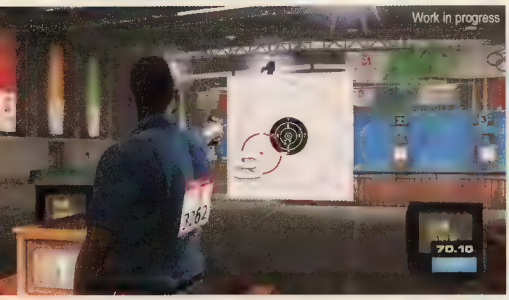
Beijing 2008

Publisher: Sega
In Stores: June





Play along with the Summer Olympics at home with *Beijing 2008*, the official game of The Games. Set in the actual Olympic venues including the National Aquatics Centre and Beijing Nation Stadium, *Beijing 08* encompasses over 35 events including track and field, wrestling, gymnastics and swimming with both women's and men's categories. Gameplay ranges from point-and-shoot mechanics to timed button pressing and some interesting analog stick shaking in track and field events. In the online features, players can compete against one another and check how their scores compare not only to other gamers but to the actual Olympic records.



Bionic Commando

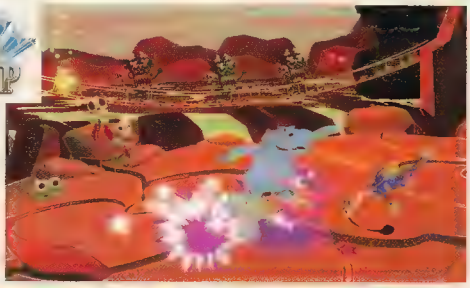
Publisher: Capcom
In Stores: Possible in 2008

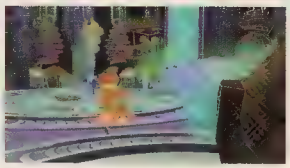
Following the release of the downloadable *Bionic Commando* game for Xbox Live Arcade and the PlayStation Network, Capcom has also completely remade the coin-op/NES hit as a 3-D third-person action adventure title. The title character, falsely imprisoned military operative Nathan Spencer, is called in to rid Ascension city of its terrorist occupation. Spencer's bionic arm lets him swing around the city, grab objects in the environment to throw at enemies, rappel down buildings and wall-walk through the decimated city as well as in the surrounding canyons and forests. Completing challenges like kill streaks will unlock upgrades along the way. Spencer's voice actor is former Faith No More/Mr. Bungle lead vocalist Mike Patton, who still hasn't thanked us for the TurboExpress and games we sent him back in 1993. (True story.)

Hail to the Chimp

Publisher: GameCock
Available Now

Hail to the Chimp is a collection of mini-games in the context of light-hearted political satire. The overarching story is that the animal kingdom is transitioning from monarchy to a democratic republic, and the candidates compete in games for up to four players with 10 levels and 16 game types. There's a lot of running around and trying to bash your political opponents; you need to steal their pick-ups and special moves for when you team up with an opposing party. As the game progresses, updates on the standings are humorously provided through the CNN-style Animal News Network, complete with pundits and commercials. Obviously, whoever wins gets to be president.

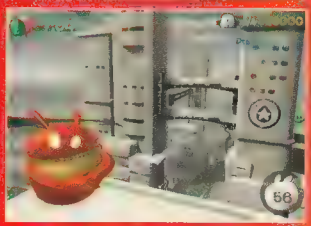


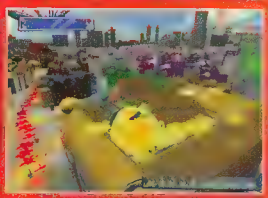


de Blob

Publisher: THQ
In Stores: June

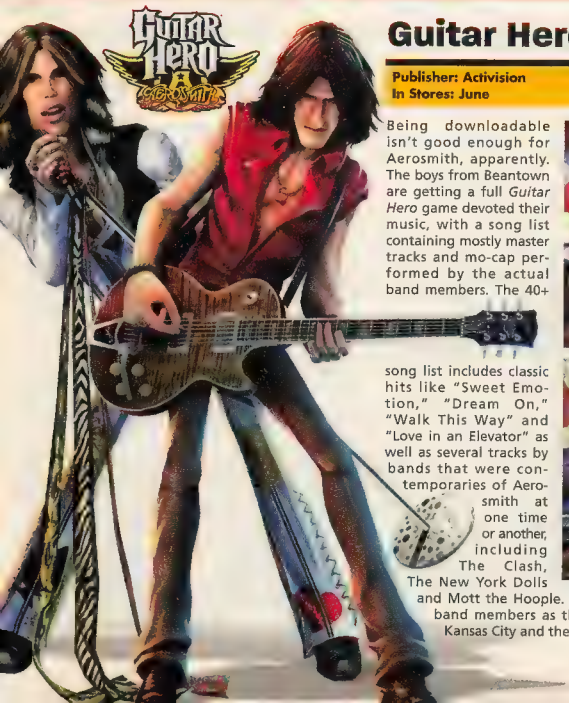
de Blob was originally developed by a group of Dutch students to illustrate how a section of their city might look in 10 years. The experiment evolved into an interactive metropolis where you, a gelatinous blob, bring color to the white-washed city by splashing it with a multicolored palette. As you coat the city in various hues of paint, you'll pick up patterns and a larger variety of shades to make the landscape and inhabitants as vibrant as possible. The multiplayer mode supports up to four players via split screen, so you can join up with friends to take down the oppressive I.N.K.T. Corporation, the source of the city's monochromatic woes.





Guitar Hero: Aerosmith

Publisher: Activision
In Stores: June

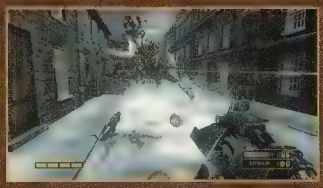


Being downloadable isn't good enough for Aerosmith, apparently. The boys from Beantown are getting a full *Guitar Hero* game devoted their music, with a song list containing mostly master tracks and mo-cap performed by the actual band members. The 40+ song list includes classic hits like "Sweet Emotion," "Dream On," "Walk This Way" and "Love in an Elevator" as well as several tracks by bands that were contemporaries of Aerosmith at one time or another, including The Clash, The New York Dolls and Mott the Hoople. Players start off as guitarist Joe Perry and unlock other band members as they jam in venues from Aerosmith's career, like Max's Kansas City and the Orpheum. (What, no Wherehouse?)

Resistance 2

Publisher: Sony
In Stores: Possible in 2008

Insomniac is hard at work on the tentatively-titled sequel to its PS3 launch title *Resistance: Fall of Man*. The follow-up pits protagonist Sgt. Nathan Hale against the Chimera once again, this time across the United States and with the help of others resistant to the Chimera virus, a task force called "The Sentinels." New elements include vehicles, never-before-seen varieties of Chimera and possibly another alien species altogether. Two campaigns are featured, including a single-player story and a co-op campaign that supports up to eight players online (or two players via split screen). The main online multiplayer modes will support up to 60 players.



Destroy All Humans! Path of the Furon

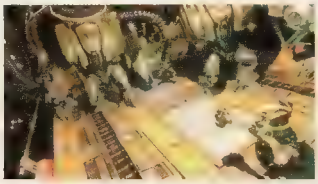
Publisher: THQ
In Stores: 4th Quarter 2008

Crypto and Orthopox are back! Unfortunately, Crypto has lost his way and forgotten his quest of world domination. Finding himself drawn to the city of Shen Long, he starts to train under a Furon martial arts master to regain his skills and the ability to save the Furons once again. The game includes five open worlds—both on the ground and in the air—as well as all-new weapons like the Venus Human Trap and Black Hole Gun. Crypto also has new abilities that allow him to stop and manipulate time. Among the many additions and changes to the series, *Path of the Furon* will include an online multiplayer mode as well as split-screen co-op and competitive play.

Too Human

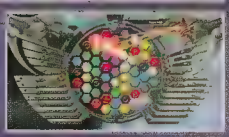
Publisher: Microsoft
In Stores: August

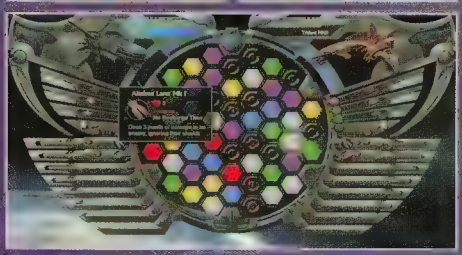
Too Human is the culmination of years of work by developer Silicon Knights, which originally attempted the project for the PlayStation (and later, the GameCube). In part one of this epic action/RPG trilogy, you play a cybernetic god by the name of Baldur whose mission is to protect humanity from evil machines in a gameworld heavily influenced by Norse mythology. Character classes include Bio-Engineer, Defender, Berserker, Commando and Champion, which represent healing, melee, gun play, aerial combat and demolition specialities. Complex skill systems, alignment and tons of weapons and items add greatly to the depth of the gameplay, which has been described as "*Devil May Cry* meets *Diablo*." *Too Human* also supports online cooperative play for up to four participants.



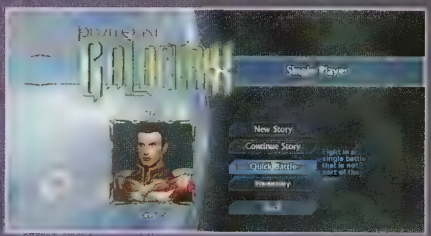
Puzzle Quest: Galactrix

Publisher: D3
In Stores: 4th Quarter 2008





Puzzle Quest: Challenge of the Warlords was one the most addicting titles of 2007, appealing to casual and hardcore gamers alike, and *Galactrix* takes the concept to the next level. This one's set in the future, where four mega corporations rule the galaxy and are somehow wiping out the human race. There's a new hexagonal playfield, with gravity affecting how pieces shift onto the board. The most significant difference, however, is the class system. Rather than choose your race/class before you launch into the expedition, your class is defined by the different ships you add to your fleet as the story progresses. When you make combos with the tiles, you gather powers for your ships. The tiles come in red, green, yellow, purple, blue and white, representing weapons, CPU, engines, ISI powers, shields and Intel, respectively. There's also a diplomacy system that shows your standing with various factions in the universe. While the core gameplay is totally *Puzzle Quest*, *Galactrix* has a more hardcore feel that hopefully won't alienate the more casual audience.



Code Lyoko: Fall of X.A.N.A.

Publisher: Game Factory
In Stores: September

The Code Lyoko crew joins up for their latest adventure in this cel-shaded RPG drawn from the fourth season of the Cartoon Network animated series. Guided by Jeremie (the group's mastermind), Aelita, Odd, Ulrich and Yumi battle their way through the digital sea to conquer the evil artificial intelligence X.A.N.A. When they encounter enemies, the game switches to turn-based 3-D battle mode with touch panels that allow you use a variety of items and special character attacks, each with unique animations. Once you've conquered foes and bosses, you'll unlock them in a special practice mode. You can also battle with friends in infrastructure mode to win (or lose) different abilities.

Space Invaders Extreme

Publisher: Square Enix
In Stores: June

We're not sure how many of our current readers were alive when the original *Space Invaders* was released (in 1978!), but this budget-priced 30th anniversary remix should be on your radar even if you never played the original. Described by its original developer (Taito) as "faster-paced" and "more intense," the *Extreme* edition offers juiced-up graphics, techno music that's "synced to gameplay," new mini-games and wireless multiplayer options. And hey, most of the *Space Invaders* remakes over the past three decades—like *Super Space Invaders* for the Game Gear, *Space Invaders* for the Super Game Boy, the Game Boy Advance version and *Space Invaders Revolution* for the DS—have actually been really good!

Scattered throughout our *Tips* pages are cheat codes that we call "Mystery Codes"—these are codes that are known to work, but we're not sure what effect they have in the game in question. Please note that these codes may not have any effect at all; there's a very strong possibility that they were left in the games inadvertently or that their effects were intentionally disabled before the games were released. However, we invite you to prove otherwise. Test out these codes for yourself; you might be the first person (other than the game's programmer) to learn what a Mystery Code does!
